FOR EVERYTHING GRAPHIC

## GRAPHIC VISIONS (GV)

GV is an established graphic arts and exhibit production firm that added offset and digital printing divisions in 1995 and a web services group in 2000. Our offices are located in Gaithersburg, Maryland and serve the entire Washington metropolitan area.

The company occupies approximately 15,000 sq. ft. of space and employs approximately 40 full-time workers. GV is unique in that it not only specializes in design but it also has the people and equipment (both graphic output and construction tools) to produce its designs, whether they are three dimensional panels, trade show booths or large wall displays. Because of this we know how to design a solution to a problem that looks fantastic and is easy to construct and install, leading to cost-effective resource allocation over project life cycles.

GV has served over 50 U.S. federal government agencies, many state and local government organizations, and hundreds of commercial clients including Fortune 100 firms. GV serves its clients as a one-stop media source for everything graphic.

GV is proud of its creativity and flexibility when working with clients who demand high quality results with very tight deadlines. Client requirements can change frequently and dramatically, often in mid-project. Our specialty is to meet these changing requirements and guide clients to the most mission – and cost-effective solutions.

GV combines cutting-edge technology and creativity to provide the highest quality service possible. Our team of graphic specialists work on both MAC and PC platforms utilizing the most up-to-date software.
